THE KENTIA PALM.

The Kentia is one of the most beautiful Palms in cultivation. It is also the best for decorating, because of its toughness and hardiness. We have an exceptionally large stock of young plants, in 2½, 3, 4, and 5-inch pots, which, if potted up during the early spring months, will produce splendid plants for next fall and winter sales.

NOTICE PRICES. Owing to our increased business demands, we have decided to concentrate our business plant by removing our glass from Nineteenth and Catherine Streets to our Penrose Nurseries, Eighteenth and Wolf Streets, South Philadelphia. We have decided to offer to the trade our splendid stock of Kentias at lower prices than the same plants could be purchased for either in this country or in Europe. This is a rare chance for florists desiring young Palms for growing on.

SCOTT'S ROSES.

To Florists desiring strong, healthy, young Roses we would state that our stock is second to none in the country. We would also call attention to the fact that we grow the **best varieties only.** Our prices will compare favorably with any first-class house, and we solicit a trial order.

TWO NEW EARLY-FLOWERING CHRYSANTHEMUMS FOR FLORISTS.

MADAME BERGMAN. A grand new Chinese variety of dwarf habit, very full in growth, and with large dark green foliage. The flowers are large and globular, with reflexed petals. Color pure white, center shaded with light yellow. Especially valuable, because it is the earliest of all the large flowering sorts. We planted two dozen plants in the open ground last summer, and they commenced flowering September 15th and lasted until October 20th. Grown under glass for cut flowers, the first blooms were cut October 5th.

FORTANIER. A new Japanese variety, very vigorous in growth, and with extra large crimson flowers, shaded with carmine. When half expanded the flowers are perfectly double, but with age the petals become reflexed, exposing the bright yellow disc, the whole flower resembling an immense crimson daisy. It blooms at the same time as Madame Bergman, and the crimson and white form a pleasing contrast. Invaluable both for cut flowers and for planting in the open ground.

Price $10.00 per 100.

NEW LARGE-FLOWERING RED-BRANCHED HYDRANGEA.

Too much cannot be said of this sterling novelty, and we know of no plant that can approach it for Easter decorations or as a pot plant for summer. Hydrangea Otaksa has heretofore been used largely for forcing for Easter, but, as a rule, the blooms are very light pink, and some are very much off-color. The new red-stemmed variety, in addition to its beautiful red stems, has flowers three to four shades brighter pink than Otaksa, and the flowers do not fade. When this variety is generally introduced we think it will take the place of Otaksa as a plant for Easter bloom. Our stock is the true large-flowering sort, and must not be confounded with the ordinary red-branched sold by some florists. Plants from 2½-inch pots, $1.00 per doz.; $8.00 per 100.

POLYANTHA, OR FAIRY ROSES.

For planting as borders for rose-beds this class is particularly valuable, and the price is as low as for bedding plants. Price $4.00 per 100, from 2½-inch pots.

GEORGE PERNET. MINIATURE.
MIGNONETTE. MADAME CECIL BRUNER.

ROSE CLOTILDE SOUPERT FOR BEDDING.

For cut flowers in the open ground during the summer months, Clotilde Soupert is indispensable. It is always in bloom, can be used either for funeral work or for bouquets, and is perfectly hardy. We expect to plant 4000 plants for this purpose ourselves, and would advise all florists needing a constant supply of Roses in the summer to plant it largely. The growth is not as dwarf as the Polyanthas, and the flowers are much larger. It has stood ten degrees below zero without protection, and from June until frost it is one mass of buds and flowers. The color is pearly white, shading to a centre of rosy pink. The flowers are borne in clusters, very double and handsomely formed. Price $4.00 per 100; $40.00 per 1000.
